Performance data quoted represents past performance. Past performance (before and after taxes) is not a guarantee of how Permanent Portfolio will perform in the future. Investment returns and principal values of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Investment performance, current to the most recent month-end, may be lower or higher than the performance quoted. It can be obtained by calling (800) 531-5142. All results are historical and assume the reinvestment of dividends and capital gains.

The Fund's investment objectives, risks, charges, and expenses must be considered carefully before investing. The statutory Prospectus and Summary Prospectus contain this and other important information about the investment companies. They may be obtained by calling (800) 531-5142. Read carefully before investing.

Permanent Portfolio invests in foreign securities, which will involve greater volatility, political, economic and currency risks, and differences in accounting methods. The fund will be affected by changes in the prices of gold, silver, Swiss franc assets and U.S. and foreign aggressive growth, real estate and natural resource stocks. The fund is non-diversified and thus may be able to invest more of its assets in fewer issuers and types of investments than a diversified fund. Investing a higher percentage of its assets in any one or a few issuers could increase the fund's risk of loss and its share price volatility. The fund may invest in smaller companies, which involve additional risks such as limited liquidity and greater volatility than larger companies. Diversification does not assure a profit nor does it protect against loss in a declining market.

Permanent Portfolio's returns reflect voluntary fee waivers in effect. In the absence of such fee waivers, total returns would be reduced. FTSE 3-Month U.S. Treasury Bill Index tracks the performance of U.S. Treasury bills with a remaining maturity of three months. S&P 500 is a market-capitalization weighted index of common stocks and represents an unmanaged portfolio of common stocks. Returns shown for these indices reflect reinvested interest and dividends as applicable, but do not reflect a deduction for fees, expenses or taxes. Indices are unmanaged and are not subject to fees and expenses. You cannot invest directly in an index.

Mutual fund investing involves risk; loss of principal is possible. Not FDIC Insured. No Bank Guarantee. May Lose Value.
